Technical Data Sheet

PRODUCT NAME:
XP Compound™

PART #:
87A
87

PACKAGE:
6 - 16 oz.
4 - 1 Gallon

PRODUCT CATEGORY:
Compounds

COLOR:
Grey/Green

SCENT:
None

ABRASIVENESS:
9 out of 10 (10 is highest amount of abrasive)

PRODUCT DESCRIPTION:
XP Compound™ is a next generation cutting compound that provides aggressive cutting action for heavy scratch removal and produces a gloss final finish. This water-based, easy-to cleanup formula is designed to remove P1500 and finer sand scratches and light-heavy oxidation on automotive painted surfaces. XP Compound may be applied using a Rotary or Orbital polisher. This product is VOC Compliant.

DIRECTIONS:
SHAKE WELL BEFORE USING. Do not apply in sunlight or on warm surfaces. Apply a 2" dab of XP Compound for a 2' x 2' (.6m x .6m) section and spread with the cutting pad. Buff at speed between 1800 to 2600 rpm. Recommended speed is 2200 rpm. Work the buffer side to side slowly in a figure eight pattern as you slowly buff the gel coat surface until most of the product is gone and gloss appears. Add more XP Compound and repeat if necessary to remove deep scratches. Remove compound splatter as soon as possible with a soft, damp cloth such as a clean microfiber cloth.

SURFACE APPLICATIONS:
For compounding clear coat, single stage, acrylic, lacquers, enamels, gel coat, as well as powder-coated paints.

ADDITIONAL USES:
Excellent on RVs, boats, motorcycles, ATVs, and other painted surfaces. XP Compound™ works great as a headlight lens repair product.

HELPFUL TIPS:
Always follow XP Compound™ with polish and wax (wax for optional added gloss and protection). Pads will affect how product works. Be sure to use correct pad depending on paint correction.

SAFETY & HANDLING:
Safety Data Sheets can found online at automagic.com.
Use proper personal protection equipment when using chemicals.
